BIANCHI

DESDE 1928

Bodegas Bianchi

Bodegas Bianchi is a 4rd generation, family-owned Argentine producer since 1928 respected for its values and wines.

After almost a century of hard work and success, Bodegas Bianchi still shines with the legacy of the family, seeking to keep alive the passion for wine, crossing borderlines and constantly exploring new horizons.

OUR TERROIR

Bodegas Bianchi encompasses the exponents of the best Terroirs of Argentina under its hallmark. The philosophy is to constantly search for the ideal Terroir for each wine, offering variety and excellence.

Bodegas Bianchi in line with the global trend, has the mission of finding the unique and unparalleled aspects of each of our estates so as to interpret the Vine's intent and provide the market with variety and excellence in each and every one of our wines.

SAN RAFAEL - MENDOZA

Our estates are located in San Rafael Mendoza: They are irrigated by the pure water from Diamante river and receive the breeze of a continental climate that marks the precise rhythm for the ripening process of the best fruits, thanks to the different temperatures between day and night.

The height over sea level varies between 700 to 900 m, with silt loam soils composed of alluvial sediments, rich in calcium and organic matter - the desired variables for an exceptional production of yards. Snow is abundant in the mountain range, thus facilitating a greater flow of irrigation water.

With an average rainfall of 190 mm from October through March, their climate is dry, and the average temperature is low – 14.8 degrees. There, the implanted varieties receive all the necessary care, maintenance and attention in order to obtain wines with the distinctive identity of San Rafael.

WINEMAKING PHILOSOPHY

Our guiding principles in wine making are to respect nature, best viticulture and oenological practices. We aim to create clean wines in which the fruit prevails with a sense of place.

In line with the idea that the soul of the wine is the fruit, we produce wines where the prevailing taste is clearly the grape. We take good care of the aroma - starting with the vine, we protect the leaves and clusters from direct sun exposure, and we control the natural flora along the vines, avoiding radiation from soil to plant and preserving the land from erosion.

Silvio Alberto – Chief Winemaker

The Family, our essence

They are our very first childhood friends, our very first affections.

They represent a very special friendship within our family.

They have a privileged place in our thoughts, being forever engraved in our memory.

They represent essential bonds in our life.

*Who has had the pleasure of growing up with **cousins** by his side knows how treasurable their moments together are. The get-togethers, the playdates, the stories, the sleepless nights talking for hours, even the fights and the reconciliations are an invaluable treasure.*

It is a life-long friendship.
